

On all template pages, there is a 1920x330 header, however there is no way to edit that in the Wordpress. I believe it is hardcoded still. I thought it would be the, “featured image” option, but it isn’t. Can you please make, “featured image” in the backend of wordpress control this header. The image also isn’t even in the media library.

Here is an example. The image I am referring to is behind, “Insurance and Financing” with a blue opacity over it:

<http://wp2.upupload.com/blog63508/db0v2mtkg63508/accepted-insurance>

Homepage and About Us:

There is no way for me to control the background image on the, “Client Testimonials.”

There is an image in the background that has the dims “1255x545” with no way to delete it or change it. The image isn’t even in the media library. Please remove the image with the dimensions from the background.

CLIENT TESTIMONIALS

Our clients have felt the pain relief. See what they're saying about us.

“ CARLEY A.
★★★★★

I was suffering from vertigo for the third or fourth time in my life and my mom saw online where there are maneuvers physical therapists can do to help. Alex was able to fit me in that same day and he knew exactly what to do to help. By that evening I was feeling so much better! Thanks so much!!! I will definitely be referring my friends and family to you!

Homepage slider:

The slider is showing the image to the left of it and I have no way to remove it as a slide. Please fix.

Physical Therapy
