

Thank you for excellence work.

I check it in desktop and it is perfect but is some issue only in **Responsive mode**.

1) **Responsive mode**: Icon of PLAY is NOT center of the box (vertical & horizontal)

2) **Responsive mode**: change the place (order) of the form and this image

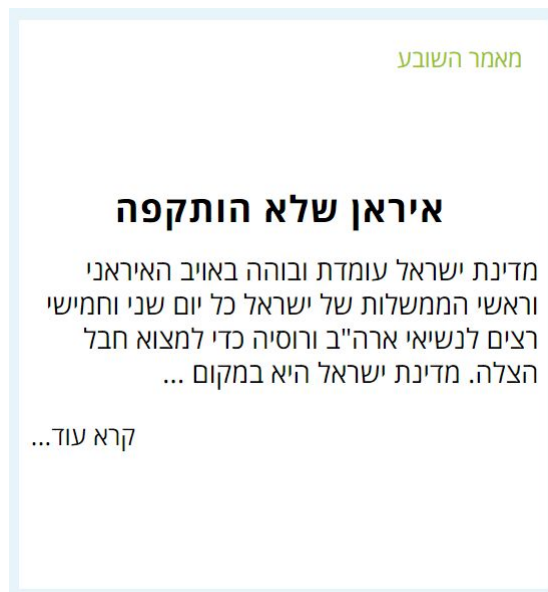

Show First, The image and then FORM

3) **Responsive mode**: change the order of text and icon (image).

- the Icon (image) must to be first and the Text.
- The icon (image) must to be center of box (horizontal)

4) **Responsive mode:** this box is Not shown in the Responsive Mode. It must to be first and the the image

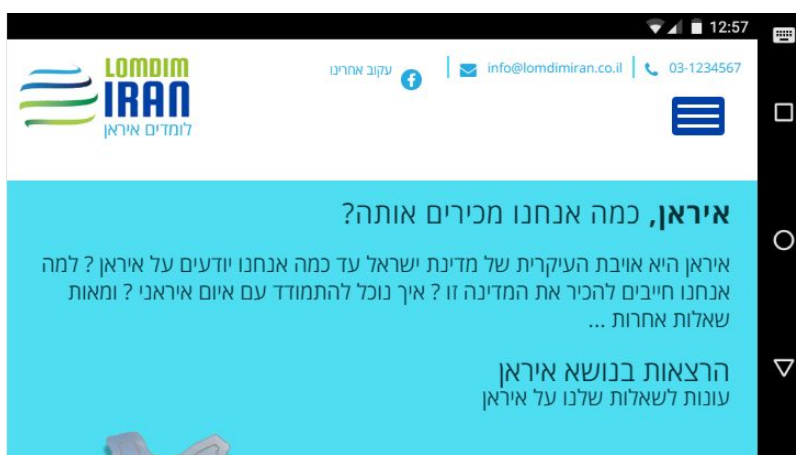

5) **Responsive mode:** the image of person must to be first (after the green Title) and then show the text

- The text must to be bigger than person name (**נועה - מרכז לימודי מזרח התיכון**)
- The green Title (**המשתתפים בהרצאות מספרים**) must to be Bigger than text and person name

6) **Responsive mode:** Icon of facebook in the Header is not align (only in the **landscape** mode)

7) Responsive mode:

- Icon of facebook in the **footer** is not align (only in the **landscape** mode)
- Email address and its icon have to be new line
